OMAR AHMED

Full-Stack Software Engineer | Node.js, React & Angular

omar.owais.dev@gmail.com | +20 110 731 4403 | Egypt
Portfolio | GitHub | LinkedIn

PROFILE

Software engineer with **3 years of experience** building frontend and backend applications across education, booking, nutrition, e-commerce and SaaS. Experienced in modular architecture, PostgreSQL performance, messaging and real-time systems, using React and Angular alongside Node.js and TypeScript.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Express.js, TypeScript, JavaScript, REST, GraphQL

Architecture & messaging: Hexagonal architecture, CQRS, DDD, RabbitMQ, WebSockets

Data: PostgreSQL, TypeORM, MongoDB, Redis, MySQL, SQL Server, Kysely

Frontend & delivery: React, Angular, Next.js, Docker, AWS, Git, Jest, Testcontainers, k6

EXPERIENCE

Raise Right | Full-Stack Developer

Jun 2025 - Present | Full-time | Cairo, on-site

- Built frontend and backend features across **6 connected product areas**: EduMarket, partner services, B2B, Roli transportation, Admin and Crew; Roli supports driver, supervisor and parent experiences.
- Contributed to EduMarket's **58-module NestJS backend**. In load tests with **300 concurrent users**, raised throughput **6.8x** (4.85 to 32.8 req/s), cut p95 latency from **60s to 9.9s**, and reduced HTTP failures from **79.5% to approximately 0%**.
- Optimized PostgreSQL read paths using targeted indexes, DataLoader and Redis caching; removed **41 circular dependencies** and supported reliability with **3,000+ automated tests**.

Apes Smart Solutions | Full-Stack Developer

Feb 2025 - Dec 2025 | Part-time | Remote

- Delivered full-stack features across **3 product areas**: nutrition applications, Spark activity bookings, and Views property/hospitality workflows.
- Applied **hexagonal architecture** and RabbitMQ messaging; used **TypeORM with PostgreSQL** for relational data and **MongoDB for audit records**.
- Built services handling **2,000+ requests/second at 99.9% uptime**; used RabbitMQ to reduce synchronous blocking by **approximately 70%** and supported **1,000+ daily bookings**.

Sarri Technology | Full-Stack Developer (MERN)

Oct 2023 - May 2025 | Full-time | Cairo, on-site

- Developed frontend and backend features and modernized a **10,000-MAU** application, reducing critical bugs by **40%** and API latency by **45%**; built multi-tenant e-commerce, booking and HR SaaS workflows.
- Built **40+ REST APIs** serving **5M+ daily requests at 99.99% uptime**; rolled out **v2 and v3** with zero-downtime deployments.

CustEx | Full-Stack Developer

Aug 2023 - Nov 2023 | Part-time | Remote

- Built frontend and backend workflows for real-time interactions and voting, handling **15,000-20,000 messages/day** with **under 150ms delivery**; reduced connection latency by **25%** with **99.7% connection success**.

EDUCATION

Fayoum University | B.Sc. Computer Science, Artificial Intelligence

Aug 2019 - Jun 2023
